

**Progress reports of Ph.D. students of cycle 35-i**

**October 11<sup>th</sup>, 2021**

11am	Andrea Valenti	Latent Representations of Generative Neural Models.	sala seminari est and remote [ <a href="#">link</a> ]
------	----------------	---	---

**October 12<sup>th</sup>, 2021**

12pm	Giacomo Iadarola	Designing Robust Software Analysis Approaches for Cybersecurity	sala seminari est and remote [ <a href="#">link</a> ]
2pm	Cosimo Rulli	Efficient Neural Networks for Ranking	sala seminari est and remote [ <a href="#">link</a> ]
3pm	Giulia Palma	Combinatorial problems arising from permutations and hypergraphs	only remote [ <a href="#">link</a> ]

**October 13<sup>th</sup>, 2021**

10am	Iason Manolas	Computational design of metamaterials: From geometry to mechanical properties	sala seminari est and remote [ <a href="#">link</a> ]
4:30pm	Tarlis Portela	Methods for Movelets Extraction: Multidimensional Sequence Classification	only remote [ <a href="#">link</a> ]

**October 14<sup>th</sup>, 2021**

10am	Salvatore Citraro	Feature-Rich Networks: when Topology meets Semantics	sala seminari est and remote [ <a href="#">link</a> ]
11am	Francesco Landolfi	Graph Theoretical Tools for Geometric Deep Learning	sala seminari est and remote [ <a href="#">link</a> ]
