

## Presentation of thesis proposals by Ph.D. students of cycle 36-ii (end of first year)

<b>January 17th, 2022</b>			
6 pm	Andrew Fuchs	Optimization of Human-Centric AI Systems via Models of Human Behavior	<a href="#">link</a>
<b>January 19th, 2022</b>			
9 am	Alessandro Berti	Quantum-Based Algorithms for Artificial Intelligence Systems	<a href="#">link</a>
2 pm	Valerio De Caro	Pervasive Learning	<a href="#">link</a>
3 pm	Matteo Loporchio	Query Authentication for Blockchain Systems	<a href="#">link</a>
4 pm	Andrea Pedrotti	Transfer Learning for Heterogeneous Data	<a href="#">link</a>
<b>January 20th, 2022</b>			
12 pm	Giuliano Cornacchia	Cooperative AI and Urban Sustainability	<a href="#">link</a>
3 pm	Domenico Tortorella	Efficient deep learning for graphs	<a href="#">link</a>
<b>January 21st, 2022</b>			
10 am	Davide Rucci	Graph Analysis: Applications and Techniques	<a href="#">link</a>
3 pm	Laura Bussi	Spatio-temporal model checking: theory, tools and case studies	<a href="#">link</a>
